NOTES

- The following is a list of wireframes for the web application.
- This includes an illustration of all the main pages when viewed on a desktop screen
- 2 examples of a mobile layout, for the main page and home page, are included.
- Similarly, 2 examples of a tablet layout -also the main and home pages – are included.
- Certain features of these wireframes are exclusive to ADMINISTRATOR users. For example, all items relating to the leader board, and the option to add concerts, will be available to view and interact with for those users, but not other users of the system.
- Wireframes, such as change password, are NOT included, as examples such of these will adopt a very similar layout to other wireframes already listed.
